

unify

Stop running around in circles!

Unify allows you to sell products on multiple channels from a single place so you can save time on data entry, see your financials from a holistic perspective, and grow your business your way. Automate your sales data directly into your accounting software. Easily add sales channels and products and integrate those channels and inventory with any accounting and email marketing platform. Eliminate unreliable processes by setting rules and scheduling automatic syncs of orders, customers, fees and expenses, accounting, and emails. Use reports on finances, customers, and inventory to strategize and expand your online presence. Bring it all together with Unify.

Customers rave about Unify

"Huge Time Saver! This app has saved me tons of time on manual entry of orders. I could not be more happy with the services that this solution provides."

—Accountfully

"We have thousands of product SKUs and hundreds of orders per week that need to be transferred over to QuickBooks Online and Unify seamlessly syncs them all. I would highly recommend this app. It's easy to use, easy to connect, and Webgility has great customer service."

—FidoFoods.com

"This solution is super helpful syncing every detail to every order with Xero. It makes life a lot easier!"

—Great Lakes Collection

"Unify has excellent functionality and it syncs right in with my QuickBooks Online. It's really easy to use—the ability to unsync an order is a super bonus. It has definitely made my job easier and saved \$\$\$\$ in accounting expenses."

—Katie Kime

"I love this app! It's truly amazing. I was doing everything by hand before inputting all of my orders. This app saves me so much time."

—Metal Marvels

Key Features of Unify

Multi-channel Selling

Sell your products on any marketplace or platform and manage all of them from one user-friendly interface. Create a master inventory list in one store or in your accounting software, and sync your inventory across channels with just one click.

Email Marketing

Integrate your curated customer lists with automated email marketing platforms like MailChimp to keep in touch with your customers, execute promotions, and carry out all of your marketing outreach efforts. Reach out and sell more.

Accounting

Automatically post all of your sales information directly into your accounting software and always know where your money is. Know your accounting is timely, accurate, organized, and tax compliant. Post all revenue streams, fees, and expenses to fully reconcile.

Sales Tax

Automatically record and validate sales tax to the state and jurisdiction level for each online order across all sales channels. Post orders to your accounting system with the sales tax included. Know your sales tax is being reported across all sales channels.

Reports

View financial reports of all channels—revenue, expenses, order volume, inventory, and much more—for insights on margins and trends. Pull customer and inventory reports to drill down on specific areas like customer behavior and vendor orders.

Automation

Schedule and automate multi-channel e-commerce data entry to remove the need for multiple entries. Eliminate error and streamline order processing, inventory management, and accounting. Click to download the order and we'll take it from there.
